

INVITATION

WORLD CONGRESS ON PARKINSON'S DISEASE AND RELATED DISORDERS

MONTREAL / CANADA

2019

16 – 19 June

Highlights

- Plenary sessions that will focus on early diagnosis and disease modification across the spectrum of movement disorders
- Parallel tracks that delve deeply into various movement disorder-related topics
- Grand Parade of Movement Disorders, an evening video session where both faculty and attendees present pre-selected cases from around the globe to showcase the amazing breadth of movement disorders
- Breakfast Educational sessions comprising hour-long didactic, as well as case-based discussions, specifically geared to young attendees
- Breakfast Mentorship sessions comprising hour-long mentoring sessions led by renowned faculty members, where young and aspiring clinicians and scientists can discuss how to establish and advance successful clinical or academic careers
- The charming city of Montreal, Canada, frequently called the Paris of the West, where you can attend numerous summer festivals and stroll through the city's old town

Welcome to the 2019 IAPRD World Congress in Montreal, Canada

Beyond Symptomatic Therapy: Quest for Disease Modification

It is our pleasure to invite you to join us for the XXIV World Congress on Parkinson's Disease and Related Disorders to be held 16 – 19 June 2019 in Montreal, Canada!

The daily agenda will highlight new frontiers in clinical management and research, focusing specifically on early diagnosis and disease modification across the spectrum of movement disorders. Powerful debates on controversial issues and practical orientated Skill Workshops support the active part of the scientific program. Plenary Sessions will provide comprehensive overviews of the latest developments in research, as well as current diagnostic and therapeutic strategies for Parkinson disease and movement disorders.

An exciting novel aspect of the Congress are daily breakfast Educational and Mentorship Sessions specifically geared to young attendees allowing young clinicians and scientists to interact with and learn from accomplished senior faculty members.

Researchers, experts and students from around the world are kindly asked to contribute their abstracts for the scientific content. Abstract presentations will allow delegates a chance to share their research, experiences, and observations.

Sponsored Sessions will feature the latest areas of focus from our industry partners.

Our meeting will convene in Montreal, the largest city in Canada's Québec province. Montreal is located on an island in the Saint Lawrence River and takes its name from the triple-peaked hill, Mount Royal, at its center. This charming city comprises distinct boroughs that include the French colonial Vieux-Montréal, or old city, where the conference center is located.

Many features make Montreal a delightful location for clinicians and scientists from around the world to gain insights, learn from one another, and move the field of movement disorders forward for the benefit of patients worldwide.
